Sir,

In response to your grievance dated 04-01-2020, the following aspects are brought to your kind notice. The methodology involved in collection and compilation of NR key statistics was well explained in our previous replies. It was clearly conveyed that level of error (Error in NR stock as a % to NR consumption) for the year 2016-17 and 2017-18 are only 1.2% and 1.7% respectively, which is less than the permissible error of upto 5%. It is reiterated that NR consumption figures are arrived at based on returns submitted by manufacturers and is not an estimate.

Yours faithfully,

Secretary (I/C)
